

FRAUD / THEFT

First To Market VIN DataTM

© ESP Data Solutions, Inc. all rights reserved, 1996-2021

Odometer fraud is the disconnection, resetting, or alteration of a vehicle's odometer with the intent to change the number of miles indicated. NHTSA estimates that more than 450,000 vehicles are sold each year with false odometer readings. This crime costs American car buyers more than \$1 billion annually.

Whatever the finance method, our 17 digit VinDecoder will verify the VIN for compliance, and then decode key VIN data elements. We also offer SquishVIN tables if you have key VIN data elements that need to be integrated with your industry specific data elements or codes.

Why choose ESP Data Solutions?

In business 25 years, over 5,000 OEM vehicle and trailer manufactures covered, simple API web solutions (web service, http) or , if you require internal integration we offer VinPOWER for Java, Python, .NET integrations.
