

# SHIPPING

## First To Market VIN Data<sup>TM</sup>

© ESP Data Solutions, Inc. all rights reserved, 1996-2021

The movement of vehicles around the globe is done by land, sea and railroad. Vehicles from Europe and Japan are first transported to the shipping docks where they are inspected then loaded on board to be shipped to North America. In Canada vehicles are shipped via railroad such CN railroad. On land vehicles are usually shipped via a vehicle auto carriers which can hold many cars at one time.

Whatever the shipping method, our 17 digit VinDecoder will verify the VIN for compliance, and then decode key VIN data elements. Such as weights and dimensions.

Why choose ESP Data Solutions?

In business 25 years, over 5,000 OEM vehicle and trailer manufactures covered, simple API web solutions (web service, http) or , if you require internal integration we offer VinPOWER for Java, Python, .NET integrations.
